Cinque secoli di storia / *Five centuries of history*

1585-1900

Le origini / *The origins*

Nelle acque della laguna veneziana affonda le sue origini la storia di Vetreria Vistosi.

The origins of Vetreria Vistosi stretch far back into the waters of the Venetian lagoon.

1585

Vincenzo Gazzabin, compare per la prima volta nei registri dell'arte vetraria muranese.

Vincenzo Gazzabin appeared for the first time in the registers of the Murano glass art.

1640

La famiglia Gazzabin, diventa proprietaria della fornace Al Bastian.

The Gazzabin family became the owner of the Al Bastian furnace.

1690

Il nome "Vistosi" fa la sua comparsa poco dopo, come soprannome di un erede della vetreria Gazzabin.

The name "Vistosi" appeared shortly afterwards as the nickname of an heir to the Gazzabin glassworks.

1791

Gio-Batta Vistosi viene nominato Gastaldo dell'Arte, capo dell'Arte dei Maestri Vetrai e rappresentante dei padroni delle fornaci muranesi.

Gio-Batta Vistosi was appointed Gastaldo dell'Arte, head of the glassmakers' guild and representative of the owners of the Murano furnaces.

1900-1980

Il Novecento / *The twentieth century*

Alla fine della seconda guerra mondiale, l'azienda inizia a concentrarsi nella produzione di articoli per l'illuminazione con Gino e Luciano Vistosi. È una storia di passione e di insaziabile ricerca del nuovo, che porta Vistosi ad iniziare importanti collaborazioni.

At the end of World War II, the company began to focus on the production of lighting products with Gino and Luciano Vistosi. That was a story of passion and insatiable search for the new, which led Vistosi to start important collaborations.

1945

Guglielmo Vistosi, erede della famiglia Gazzabin, dopo la fine della seconda guerra mondiale, apre una nuova fornace a Murano.

After the end of World War II Guglielmo Vistosi, heir of the Gazzabin family, opened a new furnace in Murano.

1969-1980

I nomi dei più famosi disegnatori dell'epoca, come Gae Aulenti, Angelo Mangiarotti, Ettore Sottsass senior e jr., Adalberto Dal Lago, Vico Magistretti, Albert Leclerc, si legano alla produzione Vistosi.

The most famous designers of the time, such as Gae Aulenti, Angelo Mangiarotti, Ettore Sottsass senior and jr., Adalberto Dal Lago, Vico Magistretti, Albert Leclerc, joined the Vistosi production.

1980-2000

La famiglia Moretti / The Moretti family

Da azienda artigiana a industria artigianale.
From craft business to craft industry.

1989

Giancarlo Moretti, imprenditore muranese da tempo attivo nel settore con Vetrolfond e Punto Luce, rileva l'azienda dando vita a Vetreria Vistosi.

Giancarlo Moretti, an entrepreneur from Murano that had long been active in the sector with Vetrolfond and Punto Luce, took over the company and created Vetreria Vistosi.

1993

Matteo Moretti, figlio di Giancarlo, attua una profonda riorganizzazione produttiva e commerciale per rilanciare il marchio.

Matteo Moretti, Giancarlo's son, carried out a deep productive and commercial reorganization to relaunch the brand.

1995

Viene creata una nuova miscela di vetro soffiato in cui è ridotto al minimo il contenuto di sodio. Il vetro acquista quasi le virtù dell'acciaio: resistenza e lucentezza.

A new blend of blown glass with a minimal amount of sodium was used. The glass has almost acquired the features of steel: it has become more resistant and brilliant.

Alcune nuove e importanti collaborazioni: Chiaramonte e Marin, Michele De Lucchi, Mauro Olivieri.

Some new and important collaborations: Chiaramonte e Marin, Michele De Lucchi, Mauro Olivieri.

2000-2005

Il Nuovo Millennio / The New Millennium

Ricerca e produzione si affinano per portare i prodotti Vistosi nei mercati esteri.

Research and production are improved to bring Vistosi products to foreign markets.

2002

Il taglio ad acqua (Water Jet) in uso nella lavorazione dei vetri piani, viene utilizzata negli articoli soffiati a bocca. Nasce Ferea.

Water jet cutting, used in the processing of flat glass, was used in mouth-blown items. Ferea was released.

2003

La lavorazione a membrana viene applicata all'illuminazione. Nasce Poc. L'argentatura delle superfici a specchio è impiegata nelle forme tridimensionali. Nasce Cheope.

The typical Murano membrane processing was applied to lighting. Poc was released. The silvering of the mirror surfaces was used in the three-dimensional forms. Cheope was released.

2004

La filatura a caldo applicata ad un intero prodotto. Nasce Damasco.

Hot spinning was applied to an entire product. Damasco was released.

2005

Nasce Giogali 3D, rivisitazione del gancio in forma tridimensionale e Diadema, le cui canne sono realizzate con una tecnica brevettata e non replicabile.

Giogali 3D, a revision of the hook in three-dimensional form, was released together with Diadema, whose rods are made with a patented, not replicable technique.

Cinque secoli di storia / Five centuries of history

2006-2010

Nuovi riconoscimenti / New awards

2006

Diadema selezionata da ADI per il XXI Premio Compasso d'Oro.

Diadema was selected by ADI for the XXI Compasso d'Oro Award.

2007

Vistosi premiata da Eurispes, alla sua 2a edizione, come eccellenza del sistema Italia.

In its second edition Eurispes awarded a prize to Vistosi as excellence in the Italian system.

2009

Nascono Rina, in cui la tecnica della murrina è applicata a grandi dimensioni, Cheope09 con nuove texture create con la sabbiatura di precisione e Minigiogali la versione ridotta di Giogali.

Rina was released. The murrine technique was applied to large models. In the same year Cheope09 and the smaller size version of Giogali, named Minigiogali, were released.

2010

Per garantire ai suoi clienti l'unicità degli articoli, Vistosi da sempre brevetta modelli ornamentali, finiture e trattamenti. Nel perfezionamento di questo processo di tutela della qualità, dal 2010 è stata introdotta anche la marcatura del prodotto.

To make sure that its clients purchase a unique object, Vistosi has always patented its decorative models, finishes and treatments. During the enhancement of this process of quality protection, in 2010 the company introduced the branding of its products.

2011-2015

Ricerca e innovazione / Research and innovation

2011

Nascono Assiba, impreziosita dalle decorazioni raffinate della filigrana a reticello, arte del decoro nel vetro soffiato a freddo.

Con la cromatura ad effetto cangiante, Cloth regala gli effetti di due articoli in uno solo: lampada metallica da spenta, delicati riflessi color miele se accesa.

Vega è la prima lampada a LED di Vistosi.

Assiba was released, embellished by the refined filigrana a reticello, the art of decoration in cold-blown glass. With its shimmering chrome plating, Cloth provides a double effect: a metallic lamp when it is off, and delicate honey reflections when it is on. Vega is the first LED lamp of Vistosi.

2013

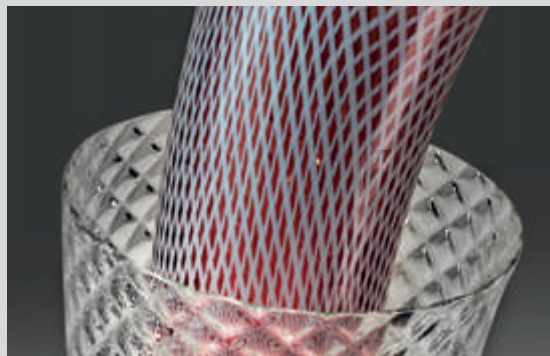

Nasce nel laboratorio Vistosi un'innovativa miscela di cristallo dai grandi vantaggi estetici, tecnologici ed ecologici: il vetro soffiato senza piombo. Questo materiale ha le virtù dell'acciaio inox, in termini di durezza nel tempo e mantenimento delle caratteristiche originarie.

An innovative crystal mixture with great aesthetic, technological and ecological advantages was created in the Vistosi laboratory: the lead-free blown glass. This new blend possesses the qualities of stainless steel, in terms of durability and maintenance of its original characteristics.

2014

Tablò premiata con la menzione d'onore al grandesignEtico.

Tablò was awarded with a honourable mention at grandesignEtico.

2016-2018

Nuovi traduardi / New achievements

2016

Futura vince Archiprodut Design Award.
Nodo selezionata da ADI per il XXV Premio Compasso d'Oro.
Trepai premiata con la menzione d'onore al grandesignEtico.

*Futura won the Archiprodut Design Award.
Nodo was selected by ADI for the XXV Compasso d'Oro Award. Trepai was awarded with a honourable mention at grandesignEtico.*

2017

50° Anniversario di Giogali.
Jube vince Archiprodut Design Award.
Sata vince il Good Design Award e il Red Dot Design Award.
Stone vince il Good Design Award

*50th Anniversary of Giogali.
Jube won the Archiprodut Design Award.
Sata won the Good Design Award and the Red Dot Design Award.
Stone won the Good Design Award.*

2018

Vistosi selezionata e premiata tra le 100 Eccellenze Italiane per il Made in Italy.

Vistosi was selected and awarded among the 100 Eccellenze italiane for Made in Italy.

2019-2020

Nuove collezioni / New collections

2019

Presentazione delle nuove collezioni a Euroluce di Armonia, Incanto, Medea, Oro, Phoenix, Plot, Puppet Ring, Riflesso, Scintilla, Tread.

Sata ottiene il German Design Award.

Jube riceve l'IF Design Award.

Riflesso vince l'Archiprodut Design Award.

Registrazione del marchio Vistosi in Cina.

30° anniversario dell'acquisizione da parte della famiglia Moretti.

Presentation of the new Armonia, Incanto, Medea, Oro, Phoenix, Plot, Puppet Ring, Riflesso, Scintilla, and Tread collections at Euroluce.

Sata wins the German Design Award.

Jube riceve l'IF Design Award.

Riflesso wins the Archiprodut Design Award.

Registrazione del marchio Vistosi in Cina.

30th anniversary of the Moretti family's acquisition.

2020

Presentazione della nuova collezione Plot Frame.

Jube in versione tavolo vince l'Archiprodut Design Award.

Armonia e Medea ottengono la Menzione D'Onore al Compasso D'Oro.

Nuove versioni Riflesso tavolo

Presentation of the new Plot Frame collection.

Jube in table version wins the Archiprodut Design Award.

Armonia and Medea receive Honorable Mention at the Compasso d'Oro.

New Riflesso table versions.

Cinque secoli di storia / Five centuries of history

2021-2023

Il Virtual Museum / The Virtual Museum

2021

Armonia selezionata nella Long List del premio ADA 2021. Collaborazioni: Main Partner della Venice Glass Week e sponsor unico della conferenza The History of Glass Beads.

Armonia selected in the Long List of the ADA 2021 award.

Collaborations: Main Partner of Venice Glass Week and sole sponsor of the conference "The History of Glass Beads".

2022

Restyling: le collezioni Giogali e Minigiogali vengono aggiornate e viene dedicato loro un nuovo catalogo. Nuovo sito web: design moderno, navigazione semplificata, informazioni dettagliate su ogni articolo. Virtual Museum: il più importante progetto di comunicazione dell'azienda. Un headquarter digitale nell'acqua per esplorare la storia, i prodotti, la vetreria, le tecnologie led e molti altri contenuti.

Restyling: The Giogali and Minigiogali collections are updated, with a new catalog dedicated to them.

New website: Modern design, simplified navigation, detailed information on each item.

Virtual Museum: The company's most important communication project. A digital headquarters in water to explore the history, products, glass factory, LED technologies, and more.

2023

Presentazione delle nuove collezioni Anisette, Faro, Groove, Modulor, Plissé, Pure, Riketta, Tier.

Presentation of the new Anisette, Faro, Groove, Modulor, Plissé, Pure, Riketta, and Tier collections.

2024-2025

I giorni nostri / Nowadays

2024

Groove vince il German Design e il Good Design Award. Plissé premiata con il Venetian Smart Lighting e il Good Design Award.

Riketta vince gli Archiproducts e il Good Design Award. Anisette vince l'ADI Design Index e la selezione al prossimo Compasso d'Oro.

Vistosi riceve il premio Valori d'impresa 2024.

Groove wins both the German Design Award and the Good Design Award.

Plissé awarded the Venetian Smart Lighting Award and the Good Design Award.

Riketta wins the Archiproducts Design Award and the Good Design Award.

Anisette selected for the ADI Design Index and shortlisted for the next Compasso d'Oro.

Vistosi receives the 2024 Valori d'Impresa Award.

2025

Triplice vittoria di Anisette, Faro e Riketta ai German Design Awards 2025.

Anisette e Plissé vincono il Red Dot Award 2025.

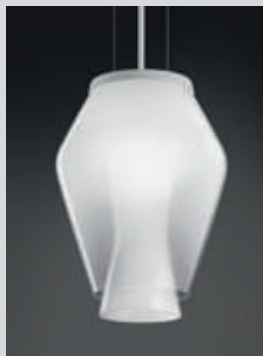

Vincitrici di IF Design Awards 2025: Anisette, Plissé, Riketta. Presentate a Euroluce 2025 Diane, Globose e Jeff e le implementazioni di Anisette, Faro, Plissé. Anisette vince il Compasso D'Oro International Awards.

Triple win for Anisette, Faro, and Riketta at the 2025 German Design Awards.

Anisette and Plissé win the 2025 Red Dot Award.

Winners of the 2025 iF Design Awards: Anisette, Plissé, and Riketta.

Diane, Globose, and Jeff unveiled at Euroluce 2025, along with new developments of Anisette, Faro, and Plissé. Anisette wins the Compasso d'Oro International Award.

I nostri numeri / *Our numbers*

La storia di Vistosi è in continua evoluzione, raggiungendo sempre nuovi Paesi, espandendo il numero delle proprie collezioni, investendo in personale giovane e qualificato, perseguendo gli standard di sostenibilità più rigorosi.

I numeri rappresentano il risultato di un continuo e costante impegno per la ricerca di linee e materiali che rispecchiano le qualità distintive dei suoi prodotti.

The Vistosi story is constantly evolving, always reaching out to new countries, expanding the number of its collections, investing in young and qualified staff, and pursuing the strictest sustainability standards. The numbers represent the result of a continuous and constant commitment to researching lines and materials that reflect the distinctive qualities of its products.

Azienda / Company

Dal 1585, Vistosi plasma il vetro di Murano, trasformando la sua magia senza tempo in un continuo dialogo tra liquido e solido, tra sogno e realtà.

Con cinque secoli di storia intrecciata al suo nome, Vistosi non segue le tendenze: le crea, interpretando il desiderio di unicità e bellezza di chi cerca l'eccezionale. Venezia è la sua musa, ma lo sguardo è sempre rivolto al mondo, alla ricerca di nuove frontiere del design.

Nella vetreria, idee audaci prendono forma, la materia si trasforma in luce, e la luce modella lo spazio. È un luogo dove la creatività respira, dove tradizione e innovazione danzano insieme. Vistosi guarda al futuro con una visione sostenibile, ripensando i processi, armonizzando l'incontro tra artisti e maestri vetrai, e custodendo un profondo rispetto per l'ambiente. Innovare è il suo destino, stupire è il suo dono.

Since 1585, Vistosi has been shaping Murano glass, transforming its timeless magic into a continuous dialogue between liquid and solid, dream and reality. With five centuries of history woven into its name, Vistosi doesn't follow trends: it creates them, interpreting the desire for uniqueness and beauty of those who seek the extraordinary. Venice is its muse, but Vistosi is always looking to the world in search of new design frontiers.

In its glassworks, bold ideas take shape, matter transforms into light, and light shapes space. a place where creativity breathes, where tradition and innovation dance together.

It is a place where creativity breathes, where tradition and innovation dance together. Vistosi moves forward with a focus on the future and a commitment to sustainability, rethinking processes, fostering collaboration between artists and master glassmakers, and preserving a deep respect for the environment. Innovation is its destiny; to amaze is its gift.

Collezione dalle forme sinuose e moderne, composta da due diffusori in vetro armoniosamente uniti tra loro da un anello metallico. Il primo vetro con finitura trasparente colorata si fonde visivamente con il secondo vetro bianco lucido, che nasconde la sorgente LED integrata. La collezione è stata ampliata ed è ora disponibile nelle tipologie sospensione, soffitto, parete, tavolo in diverse varianti.

Collection featuring sinuous, modern shapes, composed of two glass diffusers harmoniously joined by a metal ring. The first diffuser, made of colored transparent glass, visually blends with the second in glossy white glass, which conceals the integrated LED source. The collection has been expanded and is now available in suspension, ceiling, wall, and table versions in various configurations.

* Diffusore in vetro bianco orientabile.
Adjustable white glass diffuser.

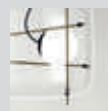

Perfetto dialogo tra differenti materiali e la fonte luminosa sospesa: questa è Plot. Ispirata agli intrecci delle impalcature orientali di bambù, Plot conferisce una sensazione di leggerezza e di sospensione, data dal gioco di equilibri in cui la sorgente LED integrata, contenuta nella sfera in vetro bianco lucido, è sostenuta attraverso l'intreccio delle bacchette metalliche. Plot unisce materiali diversi tra loro come il metallo nero opaco o ottone anticato ed il vetro in tonalità cristallo o fumé trasparente.

A perfect dialogue between different materials and the suspended light source: this is Plot. Inspired by the interlacing of oriental bamboo scaffolding, Plot conveys a sense of lightness and suspension, created by the balanced interplay where the integrated LED source, contained within the glossy white glass sphere, is supported through the interweaving of metal rods. Plot combines different materials such as matt black metal or antique brass with crystal or transparent smoky glass.

1x49W LED 08

Phoenix è una lampada a sospensione dal design moderno ed essenziale. Il diffusore e la struttura metallica, a forma di anello, nascondono perfettamente la sorgente LED integrata, conferendo una connotazione decorativa che arreda ed illumina l'ambiente con una personalità decisa ma discreta. L'illuminazione diretta definisce la zona di luce sottostante, esaltando la naturale bellezza delle tonalità fumé e cristallo del vetro impreziosite da finiture in nickel nero e rame satinato.

Phoenix is a suspension lamp with a modern and essential design. The diffuser and metal structure, shaped as a ring, perfectly conceal the integrated LED source, giving a decorative character that furnishes and illuminates the environment with a decisive yet discreet personality. The direct lighting defines the area of light below, enhancing the natural beauty of the smoke and crystal glass enriched by finishes in black nickel and matt copper.

Futura è una collezione di lampade in un unico pezzo di vetro soffiato, realizzato con una tecnica speciale che crea un raffinato doppio effetto: nella parte superiore il cristallo trasparente, mentre in quella inferiore il vetro incamiciato colorato nasconde la sorgente luminosa. È disponibile in tre diverse cromie: ambra con anello in ottone, bianco con anello nero opaco e fumé con anello marrone. La versione con diffusore interamente in cristallo trasparente è invece proposta con anello in rame o nero opaco. La collezione è disponibile nelle versioni a sospensione, soffitto, parete, tavolo e terra.

Futura is a collection of lamps made from a single piece of hand-blown glass, crafted using a special technique that creates a refined double effect: transparent crystal on the upper part, while the colored cased glass on the lower part conceals the light source. It is available in three different color combinations: amber with a brass ring, white with a matt black ring, and fumé with a brown ring. The version with a fully transparent crystal diffuser is instead offered with a copper or matt black ring. The collection is available in suspension, ceiling, wall, table, and floor versions.

Collezione che coniuga design moderno, modularità e raffinatezza estetica in un'unica soluzione luminosa. Due dischi in vetro bianco satinato di diverso diametro possono essere combinati insieme o utilizzati singolarmente ad un terzo elemento posto alla base, che custodisce le due sorgenti LED integrate predisposte per doppia accensione. Questi elementi, componibili in diverse configurazioni, sono uniti da cavi elettrici lungo i quali è possibile posizionare i diffusori in vetro, in coppia o singolarmente all'altezza desiderata, dando vita a forme ed equilibri sempre nuovi.

This collection combines modern design, modularity, and aesthetic sophistication in a single lighting solution. Two satin white glass discs of different diameters can be paired together or used individually with a third element positioned at the base, which houses the two Integrated LED sources with dual switching option. These elements, which can be arranged in various configurations, are connected by electrical cables along which the glass diffusers used in pairs or individually can be positioned at the desired height, creating ever-changing compositions and visual balance.

La "tecnicità" dell'elemento metallico unito al diffusore in vetro soffiato conferisce a Tread uno stile "industriale". Un oggetto che ricorda le apparecchiature elettriche vintage per la sua forma particolare, in cui il dissipatore alettato, unito al vetro soffiato, diviene elemento caratterizzante. Sorgente LED integrata.

The "technicity" of the metal element combined with the blown glass diffuser gives Tread an "industrial" style. An object reminiscent of vintage electrical equipment for its particular shape, in which the finned heat sink, combined with blown glass, becomes a distinctive element. Integrated LED light source.

Scintilla è una forma classica, senza tempo. La sorgente LED integrata accende la silhouette sinuosa, creando giochi di luce ed emozione grazie al fondo pieno del suo bicchiere in vetro. Nel suo nome è insita l'idea, la forma della luce che prende vita nelle trasparenze del cristallo. Disponibile nella tipologia sospensione con finitura vetro cristallo trasparente e finiture metalliche antracite, bronzo lucido e opaco, ottone lucido.

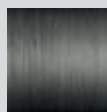

Scintilla is a classic, timeless shape. The integrated LED source illuminates the sinuous silhouette, creating light plays and emotion thanks to the solid base of its glass cup. The name itself embodies the idea and shape of light coming to life within the crystal's transparency. Available as a suspension, with transparent crystal glass finish and metal finishes in charcoal grey, glossy and matt bronze, glossy brass.

La collezione Medea esprime l'equilibrio perfetto tra forme geometriche essenziali e raffinata eleganza. La luce LED integrata illumina il piano, diffondendo una luce soffusa nell'ambiente. Proposte in gruppo o valorizzate singolarmente, queste lampade diventano vere sculture luminose, capaci di trasformare ogni spazio con carattere e stile. Le finiture del vetro disponibili per i modelli indicati sono: bianco sfumato, cristallo, fumé e verde antico trasparente, con finiture metalliche in acciaio satinato.

The Medea collection strikes a perfect balance between essential geometric shapes and refined elegance. The integrated LED light illuminates the surface, softly diffusing light throughout the environment. Offered in groups or showcased individually, these lamps become luminous sculptures that transform any setting with character and style. Available glass finishes for the indicated models include shaded white, crystal, smoky, and old green, with matt steel metal finishes.

Armonia è una collezione dai connotati contemporanei che racchiude preziosi elementi della tradizione vetraria, come le lavorazioni "balloton" e rigadin, sia dritto che ritorto. I cilindri in vetro, proposti in cinque diverse colorazioni e quattro finiture, sono disponibili nelle versioni a sospensione in due dimensioni e nella tipologia applique.

Armonia is a collection with a contemporary character that incorporates precious elements of glassmaking tradition, such as the "balloton" technique and both straight and twisted rigadin. The glass cylinders, available in five different colors and four finishes, come in two suspension sizes and a wall type.

I diffusori di Puppet sono realizzati con un'antica tecnica di soffiatura del vetro all'interno di una gabbia metallica, che imprime sulla superficie una serie di raggi verticali, generando riflessi di luce unici e suggestivi. Nella versione a sospensione, può essere installata come caduta singola oppure in configurazioni multiple, con rosone lineare o tondo a più pendenti. Disponibile anche nelle tipologie da parete e tavolo.

Puppet's diffusers are crafted using an ancient glass-blowing technique inside a metal cage, which imprints a series of vertical rays on the surface, creating unique and evocative light reflections. In the suspension type, can be installed as a single element or in multiple configurations, with a linear or round canopy featuring multiple pendants. Also available in the wall and table types.

L'elemento distintivo di questo modello della collezione Puppet Ring sono gli anelli con diametro crescente, che possono essere accostati con sequenze differenti per costituire l'armatura su cui andare ad appoggiare le preziose sfere in vetro di tre dimensioni differenti che si fondono con la struttura grazie ad una preformatura interna al vetro soffiato. Esteticamente leggera ed elegante, Puppet Ring coniuga in modo etero vetro cristallo, fumé, ambra e bianco sfumato con finiture oro e nickel nero satinato.

The distinctive feature of this model from the Puppet Ring collection are the rings with increasing diameter. They can be combined in different sequences to form the framework on which the precious glass spheres in three different sizes are placed, blending with the structure thanks to a preformation inside the blown glass. Aesthetically light and elegant, Puppet Ring ethereally combines crystal, smoky, amber and shaded white glass with gold and black matt nickel finishes.

Jeff è l'espressione pura del design contemporaneo: una sospensione che trasforma la luce in arte e l'arte in luce. Con Sorgente LED integrata e un corpo in puro cristallo con lavorazione rigadin, Jeff illumina con eleganza e trasforma ogni ambiente in uno spazio unico. La collezione è composta da elementi allungati e a goccia, ripetibili e combinabili per dare vita a infinite composizioni. Da accesa, rivela linee sinuose e dinamiche; da spenta, diventa una scultura di vetro che arreda con personalità e fantasia.

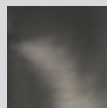

Jeff is the pure expression of contemporary design: a suspension lamp that turns light into art, and art into light. Featuring integrated LED sources and a body in pure crystal with rigadin glasswork, Jeff illuminates with elegance and transforms any setting into a unique space. The collection consists of elongated, drop-shaped elements that can be repeated and combined to create endless compositions. When lit, it reveals flowing, dynamic lines; when off, it becomes a glass sculpture that decorates with personality and imagination.

Pure è una collezione che si distingue per una forma semplice, che ricorda quella di una trottola in movimento. Un vetro spesso illuminato da una sorgente LED integrata, che viene filtrata da un fondo pieno per non risultare abbagliante. La cupola della montatura è stata studiata per rendere la lampada orientabile. La ridotta dimensione del diffusore rende la sospensione adatta per composizioni in cluster, dove i diffusori possono essere liberamente orientati per dar vita a configurazioni sempre nuove. Finiture vetro: cristallo trasparente e bianco sfumato. Montatura in finitura antracite e bronzo opaco.

Pure is a collection distinguished by its simple shape, reminiscent of a spinning top in motion. A thick glass illuminated by an integrated LED source, filtered by a solid base to prevent glare. The canopy is designed to make the lamp adjustable. The small size of the diffuser makes the suspension suitable for cluster compositions, where the diffusers can be freely oriented to create ever-changing configurations. Finishes: transparent crystal and shaded white glass. Frame in charcoal grey and matt bronze finish.

Globose è una collezione dinamica e versatile. La sospensione, disponibile in due dimensioni con quattro o sei diffusori, consente di distribuire la luce a 360°, valorizzando lo spazio. La collezione gioca sull'equilibrio tra due elementi visivamente contrastanti: la rigidità geometrica della struttura e la morbidezza delle forme dei diffusori in vetro soffiato disponibili in due finiture bianco sfumato e una nuova texture cristallo trasparente che ricorda il vetro martellato. La montatura a sezione quadrata si sviluppa in modo fluido e continuo, dando vita a linee ortogonali che si intrecciano e si richiudono su sé stesse. Disponibile anche nella versione applique.

Globose is a dynamic and versatile collection. The pendant version, available in two sizes with four or six diffusers, provides 360° light distribution, enhancing the space. The collection plays on the balance between two visually contrasting elements: the geometric rigidity of the structure and the softness of the blown glass diffusers, available in two finishes shaded white and a new transparent crystal texture inspired by hammered glass. The square-section frame develops in a fluid, continuous way, forming orthogonal lines that intersect and fold back onto themselves. Also available in a wall type.

La collezione prende ispirazione dal design rigoroso di linee e superfici del minimalismo dei primi anni '60. Forme regolari si contrappongono a elementi più morbidi attraverso il sapiente uso delle finiture metalliche e la lavorazione del vetro. La struttura è stata pensata per consentire grande flessibilità grazie al sistema di aggancio dei frame metallici, che, scorrendo, creano geometrie sempre nuove. I diffusori sono disponibili in finitura bianco sfumato o satinato, mentre la struttura in metallo è proposta in finitura antracite o bronzo opaco.

The collection is inspired by the rigorous design of lines and surfaces of early 1960s minimalism. Regular shapes are contrasted with softer elements through the skillful use of metal finishes and glass fabrication. The structure has been designed to allow great flexibility thanks to a system of fixing of the metal frames, which, by sliding, create ever new geometries. The diffusers are available in shaded white or matt finishes, while the metal frame is offered in anthracite or matt bronze finishes.

Peggy nasce dall'incontro di opposte polarità cromatiche e materiche. Un progetto illuminotecnico che unisce la leggerezza del vetro soffiato bianco lucido, lavorato interamente a mano, alla forza espressiva del metallo: nero lucido o ottone anticato. Un connubio di grande impatto visivo, capace di esprimere al contempo razionalità ed eleganza. Disponibile come sospensione, in versione singola o a nove luci, oltre che nelle tipologie parete e terra.

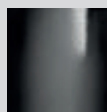

Peggy is born from the meeting of opposing chromatic and material polarities.. A lighting design project that combines the lightness of glossy white blown glass, entirely handmade, with the expressive strength of metal: glossy black or antique brass. A combination with great visual impact, capable of expressing both rationality and elegance. Available as a suspension, in single or nine-light versions, as well as in wall and floor types.

Novecento nasce dal desiderio di rileggere in chiave contemporanea il tradizionale lampadario muranese. Le sue forme, eleganti e fluide, richiamano la classicità del candelieri veneziano, reinterpretata attraverso un segno essenziale e attuale. Protagonista assoluto è il vetro, disponibile nelle finiture cristallo trasparente o bianco rigadin: le sottili rigature radiali che ne attraversano la superficie evocano il movimento armonico dei bracci dei lampadari storici, regalando alla luce un effetto vibrante e prezioso. La sospensione è proposta in tre dimensioni, pensate per adattarsi con eleganza a spazi di diversa scala e carattere. Le altre tipologie: soffitto, tavolo e terra riprendono la silhouette iconica della sospensione, reinterpretandola con proporzioni e dettagli calibrati.

Novecento was born from the desire to reinterpret the traditional Murano chandelier in a contemporary key. Its elegant, fluid shapes recall the classic Venetian candelabra, renewed through a clean and modern design. The true protagonist is the glass, available in clear crystal or white rigadin finishes. The fine radial grooves across its surface evoke the graceful movement of historical chandelier arms, giving the light a vibrant and precious effect. The suspension is offered in three sizes, designed to suit spaces of different scales and characters with elegance. The other types: ceiling, table, and floor retain the iconic silhouette of the suspension, reinterpreted with refined proportions and details.

Diffusori posizionabili in quattro diverse configurazioni, sorgente luminosa regolabile in altezza.

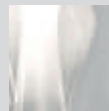

Glass diffusers can be arranged in four different positions, lighting source can be adjusted.

Anisette è una collezione dalle geometrie moderne, che richiama la forma di una lanterna. Grazie a un particolare sistema di aggancio, che nasconde completamente la montatura e consente il fissaggio dei vetri senza forature, i due diffusori in cristallo bianco sfumato possono essere composti in quattro configurazioni diverse, giocando con la sorgente luminosa interna e con le trasparenze del vetro. Una lampada scultorea che, da accesa, crea atmosfere coinvolgenti grazie alla sfumatura del vetro, e da spenta si trasforma in un oggetto di design che arreda con carattere. Finitura struttura bianco opaco. Disponibile nelle tipologie sospensione e tavolo.

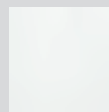

Anisette is a collection defined by modern geometries, reminiscent of a lantern's shape. Thanks to a special fastening system that fully conceals the mounting structure and allows the glass elements to be fixed without drilling, the two shaded white crystal diffusers can be arranged in four different configurations, playing with the inner light source and the transparency of the glass. A sculptural lamp that, when lit, creates an immersive atmosphere through the delicate shading of the glass and when off, becomes a striking design piece. Matt white metal finish. Available in suspension and table types.

1x12W LED 03

Incanto, nella sua nuova versione, è stata completamente riprogettata. Il diametro ridotto di alcuni centimetri consente una migliore integrazione della montatura, diminuendo la distanza dal soffitto e ottimizzando la dissipazione della sorgente LED integrata. Il risultato estetico è più armonioso e valorizza il vetro bianco sfumato del diffusore, vero protagonista della collezione. Le tonalità neutre e le linee semplici ed eleganti la rendono adatta ad ambienti dallo stile eterogeneo. Disponibile nelle tipologie sospensione e plafoniera.

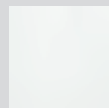

Incanto has been completely redesigned in its new version. The diameter has been slightly reduced to improve the integration of the frame, minimizing the distance from the ceiling and enhancing the dissipation of the integrated LED source. The final result is more visually balanced, highlighting the beauty of the shaded white glass diffuser. Its neutral tones and clean, elegant lines make it suitable for a wide range of interior styles. Available in suspension and ceiling types.

STONE SP

1x2W+1x8W LED 12

USA & CANADA

1x2W+1x8W LED 12

Stone è caratterizzata da volumi quasi scolpiti, dove la leggerezza del vetro soffiato si oppone alla solidità di geometrie lineari. In questo contrappunto, tra l'utilizzo di un materiale che naturalmente tende alla forma tonda e un design rigoroso che impone spigoli e linee ortogonali, si esprime l'equilibrio di una composizione luminosa di carattere, inedita. Il diffusore è in cristallo trasparente, mentre le finiture metalliche sono in nickel nero. Sorgente LED integrata.

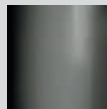

Stone is defined by almost sculpted volumes, where the lightness of blown glass contrasts with the solidity of linear geometries. In this counterpoint, between the use of a material that naturally tends toward rounded forms and a rigorous design imposing sharp edges and orthogonal lines, the balance of a luminous composition with strong character and originality is expressed. The diffuser features a transparent crystal finish the metal finishes are in black nickel. Integrated LED source.

Un anello, infinite combinazioni. La matrice da cui nasce l'idea della collezione Ecos è una sola: l'anello di vetro. Questo elemento distintivo rende la collezione estremamente personalizzabile in termini di forme e dimensioni, per un'illuminazione originale e scenografica. Disponibile in vetro bianco o cristallo, entrambi con lavorazione rigadin. Parti metalliche nelle finiture bronzo satinato o cromo lucido. Proposta nelle versioni a sospensione, soffitto, parete e terra.

One ring, endless combinations. The concept behind the Ecos collection is based on a single element: the glass ring. This distinctive shape makes the collection highly customizable in both form and size, offering truly original lighting solutions. Available in white or clear crystal glass, both with rigadin texture. Metal parts come in satin bronze or polished chrome finishes. Offered in suspension, ceiling, wall, and floor versions.

Luce in movimento. È la sensazione che pervade l'ambiente quando si accende una Diadema. Ogni composizione nasce da un singolo elemento: una canna in vetro di cristallo trasparente. Attraverso un sistema modulare che combina canne di diverse lunghezze, la luce si riflette e si propaga con dinamismo. Disponibile nelle tipologie sospensione e parete. Finiture metalliche: bronzo satinato o cromo lucido.

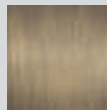

Light in motion. This is the sensation that fills the space when a Diadema is switched on. Each composition originates from a single element: a transparent crystal glass rod. Through a modular system that combines rods of different lengths, light reflects and spreads dynamically. Available in suspension and wall types. Metal finishes: matt bronze or glossy chrome.

Minigiogali si ispira al gancio in cristallo della collezione Giogali, ma in una versione dalle dimensioni più contenute. Questa variante più essenziale conserva l'eleganza modulare tipica della collezione, offrendo la massima libertà compositiva per soluzioni su misura. Disponibile in diverse tipologie e dieci finiture vetro, Minigiogali rappresenta la scelta ideale per ambienti che richiedono un tocco di leggerezza ed eleganza.

Minigiogali draws inspiration from the crystal hook of the Giogali collection, reinterpreted in a smaller scale. This more essential version retains the modular elegance of the original, offering maximum freedom for custom compositions. Available in various configurations and ten glass finishes, Minigiogali is the perfect choice for spaces that call for a touch of lightness and elegance.

Damasco è una collezione realizzata con la tecnica a bozzolo, in cui l'originale decoro diventa materia: fili di vetro trasparente fuso si sovrappongono per creare una texture in rilievo. È possibile scegliere tra tre forme diverse di diffusore, installabili come pendenti singoli o in configurazioni multiple con rosone. Disponibile con sorgente tradizionale o LED integrata. Proposta nelle tipologie sospensione, soffitto, parete e tavolo.

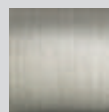

Damasco is a collection crafted using the cocoon technique, where decorative glass threads fuse and layer to form a raised texture that becomes tangible material. You can choose between three diffuser shapes, installable as single pendants or in multi-light configurations with a canopy. Available in traditional or integrated LED versions. Offered in suspension, ceiling, and wall versions.

La silhouette di Spirit ricorda quella di un diamante soffiato nel vetro. La texture che caratterizza il diffusore nasce da una particolare tecnica di soffiatura all'interno di una gabbia. Questa lavorazione permette di catturare la luce e rifletterla, creando giochi di luce unici. Disponibile nelle tipologie sospensione, soffitto e parete. Finitura vetro cristallo trasparente; finitura montatura nickel satinato.

The silhouette of the Spirit resembles that of a diamond blown in glass. The texture characterizing the diffuser is created using a special blowing technique inside a cage. This process allows the light to be captured and reflected, creating unique light effects. Available in suspension, ceiling, and wall types. Glass finish in transparent crystal; frame finish in satin nickel.

Oro è una collezione dalle forme semplici, resa unica dalla preziosa lavorazione artigianale che impiega una membrana interna orizzontale per dividere la sfera di cristallo trasparente in due metà. Ogni pezzo è irripetibile: la curvatura della membrana, ottenuta durante la soffiatura del vetro, nasce da un processo interamente manuale. Disponibile in versione sospensione, in due misure, con sorgente luminosa tradizionale o LED integrato. Finiture metalliche: acciaio satinato, bianco opaco, nickel nero satinato e ottone lucido.

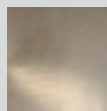

Oro is a collection defined by simple forms, made unique by a refined artisanal process that introduces a horizontal inner membrane, dividing the transparent crystal sphere into two halves. Each piece is one of a kind: the curvature of the membrane, formed during the glassblowing process, is the result of an entirely manual technique. Available as a suspension lamp in two sizes, with either a traditional light source or integrated LED. Metal finishes: matt steel, matt white, matt black nickel, and glossy brass.

Diamante è una collezione che si distingue per l'elegante lavorazione artigianale del vetro. Il diffusore viene soffiato all'interno di una gabbia metallica che imprime al cristallo una serie di raggi verticali, partendo dal centro della lampada e percorrendone tutta la superficie. Questa tecnica conferisce al vetro trasparente una poesia unica: quando la lampada è spenta, il gioco delle incisioni crea riflessi preziosi; quando è accesa, la luce si arricchisce di sfumature vibranti e suggestive. Disponibile con sorgente tradizionale o LED integrata. Proposta nelle tipologie sospensione, soffitto e faretto.

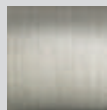

Diamante is a collection that stands out for its refined artisanal glasswork. The diffuser is blown inside a metal cage that imprints a series of vertical rays radiating from the center of the lamp across the entire surface of the glass. This unique technique gives the transparent crystal glass a poetic quality: when the lamp is off, the etched lines create precious reflections; when lit, the light is enriched with vibrant and evocative nuances. Available with traditional or integrated LED light source. Offered in suspension, ceiling, and spotlight types.

Lio è una collezione dal design minimalista e raffinato, che valorizza la sorgente luminosa grazie a una fascia di vetro bianco lucido racchiusa tra strati di cristallo. La forma semplice del diffusore cilindrico è ripresa, con leggere variazioni, anche nelle versioni da parete e da tavolo. Nelle versioni a soffitto e a parete, il diffusore assume una seconda forma, circolare, ed è disponibile in tre misure, mantenendo la particolare lavorazione del vetro che alterna fasce di cristallo e vetro bianco lucido. La collezione è disponibile con sorgente tradizionale o LED integrato.

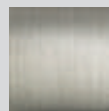

Lio is a collection with a minimalist and refined design that enhances the light source through a glossy white glass band encased between layers of crystal. The simple cylindrical shape of the diffuser is echoed, with slight variations, in the wall and table versions. In the ceiling and wall-mounted versions, the diffuser takes on a second, circular shape and is available in three sizes, maintaining the distinctive glasswork that alternates crystal and glossy white glass bands. The collection is available with either a traditional light source or integrated LED.

1×60W G9

Sospensione in vetro soffiato incamiciato bianco lucido. Le dimensioni ridotte del corpo tubolare richiedono un'elevata maestria nella fase di soffiatura per garantire uno spessore omogeneo. Grazie alla sorgente luminosa alogena Candela crea un effetto luce di sicuro fascino.

A suspension made with glossy white blown cased glass. Its narrow diameter needs a good deal of skill to blow a piece with homogeneous thickness. Thanks to its halogen light source, Candela creates a fascinating light effect.

Collezione composta da diffusori in vetro bianco satinato, caratterizzati da due diverse geometrie esagonali irregolari. Nelle versioni da parete e soffitto, che prevedono l'utilizzo di frame metallici con due o tre lampade, ognuna dotata di proprio driver, la montatura pre-cablatà consente il decentramento degli elementi, permettendo l'alimentazione di più corpi illuminanti da un unico punto luce. Disponibile con sorgente LED integrata o tradizionale.

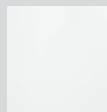

Collection composed of matt white glass diffusers, featuring two distinct irregular hexagonal geometries. In the wall and ceiling versions, which include metal frames with two or three light fixtures each equipped with its own driver, the pre-wired mounting system allows for the decentering of the elements, enabling multiple lights to be powered from a single electrical point. Available with integrated LED or traditional light source.

Infinita è una collezione dal design semplice e senza tempo. Caratterizzata da una forma che ricorda una mezza sfera con fondo pieno. Il diffusore in vetro bianco satinato diffonde una luce uniforme, diffusa e non abbagliante. Ideale per illuminare con eleganza sia ambienti domestici sia spazi professionali, è particolarmente adatta anche a contesti di ampie dimensioni, grazie alle varianti di diametro più grande. Disponibile nelle tipologie a sospensione, soffitto e parete, in tre diverse dimensioni, con sorgente tradizionale o LED integrato.

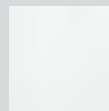

Infinita is a collection with a simple and timeless design. Characterized by a shape reminiscent of a half-sphere with a closed bottom. The matt white glass diffuser emits a uniform, diffused, and glare-free light. Ideal for elegantly illuminating both residential and professional spaces, it is also particularly suited for large environments thanks to its larger diameter variants. Available in suspension, ceiling, and wall types, in three different sizes, with traditional or integrated LED light source.

Balance è una collezione in vetro soffiato incamiciato bianco lucido, ispirata all'armonia delle orbite planetarie. Il diffusore, con la sua silhouette fluida, crea un segno distintivo che arricchisce lo spazio con eleganza e carattere. Raffinata come elemento singolo, Balance rivela tutta la sua forza espressiva in composizioni multiple, diventando protagonista di scenografie luminose dal forte impatto visivo. È disponibile con sorgente tradizionale o LED integrato, nelle versioni a sospensione, soffitto e parete, in tre diverse dimensioni.

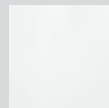

Balance is a collection in glossy white layered blown glass, inspired by the harmony of planetary orbits. The diffuser, with its fluid silhouette, creates a distinctive presence that enriches any space with elegance and character. Refined as a standalone piece, Balance reveals its full expressive power in multiple compositions, becoming the centerpiece of luminous settings with strong visual impact. Available with traditional or integrated LED light sources, in suspension, ceiling, and wall types, and in three different sizes.

Neochic è una collezione che celebra la purezza e l'unicità del vetro soffiato. Quattro sagome morbide e asimmetriche in vetro bianco satinato, che esprimono un'estetica minimale dal carattere deciso. Nella tipologia soffitto e parete grazie alla particolare montatura, completamente nascosta all'interno del vetro, garantisce un'aderenza ottimale alla superficie di installazione, riducendo al minimo la distanza dal supporto. È disponibile con sorgente tradizionale o LED integrato, nelle versioni sospensione, soffitto e parete.

Neochic is a collection that celebrates the purity and uniqueness of blown glass. Four soft, asymmetrical shapes in satin white glass express a minimal aesthetic with a bold character. In the ceiling and wall versions, thanks to the special mounting system completely concealed within the glass, it ensures optimal adherence to the installation surface, minimizing the distance from the support. Available with traditional or integrated LED light sources, in pendant, ceiling, and wall types.

Lucciola è una collezione iconica che celebra l'eleganza del vetro soffiato. La forma ovale del diffusore in vetro satinato bianco è proposta in cinque diverse dimensioni, studiate per adattarsi con equilibrio a spazi di diversa ampiezza. La collezione si articola in cinque tipologie: sospensione, soffitto, parete, tavolo e terra garantendo versatilità e personalità in ogni ambiente. Le versioni a sospensione sono disponibili con finiture metalliche in bianco opaco o nickel satinato, per una perfetta integrazione con lo stile dello spazio. Disponibile con sorgente tradizionale o LED integrato.

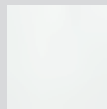

Lucciola is an iconic collection that celebrates the elegance of blown glass. The oval-shaped diffuser, made of satin white glass, is available in five different sizes, designed to harmoniously suit spaces of various dimensions. The collection includes five types: suspension, ceiling, wall, table, and floor offering versatility and character in any setting. Suspension models come with metal finishes in matte white or satin nickel, allowing seamless integration with different interior styles. Available with traditional or integrated LED light sources.

Collezione dalle forme sinuose e moderne, composta da due diffusori in vetro armoniosamente uniti tra loro da un anello metallico. Il primo vetro con finitura trasparente colorata si fonde visivamente con il secondo vetro bianco lucido, che nasconde la sorgente LED integrata. La collezione è stata ampliata ed è ora disponibile nelle tipologie sospensione, soffitto, parete, tavolo in diverse varianti.

Collection featuring sinuous, modern shapes, composed of two glass diffusers harmoniously joined by a metal ring. The first diffuser, made of colored transparent glass, visually blends with the second in glossy white glass, which conceals the integrated LED source. The collection has been expanded and is now available in suspension, ceiling, wall, and table versions in various configurations.

Futura è una collezione di lampade in un unico pezzo di vetro soffiato, realizzato con una tecnica speciale che crea un raffinato doppio effetto: nella parte superiore il cristallo trasparente, mentre in quella inferiore il vetro incamiciato colorato nasconde la sorgente luminosa. È disponibile in tre diverse cromie: ambra con anello in ottone, bianco con anello nero opaco e fumé con anello marrone. La versione con diffusore interamente in cristallo trasparente è invece proposta con anello in rame o nero opaco. La collezione è disponibile nelle versioni a sospensione, soffitto, parete, tavolo e terra.

Futura is a collection of lamps made from a single piece of hand-blown glass, crafted using a special technique that creates a refined double effect: transparent crystal on the upper part, while the colored cased glass on the lower part conceals the light source. It is available in three different color combinations: amber with a brass ring, white with a matt black ring, and fumé with a brown ring. The version with a fully transparent crystal diffuser is instead offered with a copper or matt black ring. The collection is available in suspension, ceiling, wall, table, and floor versions.

1x12W LED 03

Incanto, nella sua nuova versione, è stata completamente riprogettata. Il diametro ridotto di alcuni centimetri consente una migliore integrazione della montatura, diminuendo la distanza dal soffitto e ottimizzando la dissipazione della sorgente LED integrata. Il risultato estetico è più armonioso e valorizza il vetro bianco sfumato del diffusore, vero protagonista della collezione. Le tonalità neutre e le linee semplici ed eleganti la rendono adatta ad ambienti dallo stile eterogeneo. Disponibile nelle tipologie sospensione e plafoniera.

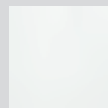

Incanto has been completely redesigned in its new version. The diameter has been slightly reduced to improve the integration of the frame, minimizing the distance from the ceiling and enhancing the dissipation of the integrated LED source. The final result is more visually balanced, highlighting the beauty of the shaded white glass diffuser. Its neutral tones and clean, elegant lines make it suitable for a wide range of interior styles. Available in suspension and ceiling types.

Pod è una collezione realizzata attraverso una particolare lavorazione completamente artigianale, in cui ogni diffusore diventa un pezzo unico e irripetibile. La macchia in vetro bianco lucido, racchiusa all'interno, assume ogni volta forme diverse, resa protagonista dal contrasto con il bordo satinato che ne definisce i contorni con eleganza. Il diffusore, caratterizzato in entrambe le dimensioni da un'altezza molto contenuta, cela completamente la montatura, lasciando che sia il vetro a emergere come unico protagonista. Pod è proposta nelle versioni da soffitto e da parete. Sorgente LED integrata.

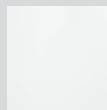

Pod is a collection created through a distinctive, fully handcrafted process, in which each diffuser becomes a unique and unrepeatable piece. The glossy white glass stain enclosed within takes on different shapes each time, brought to the forefront by the contrast with the satin-finished edge that elegantly defines its outline. The diffuser, featuring a very shallow profile in both available sizes, completely conceals the mounting structure, allowing the glass to emerge as the sole protagonist. Pod is available in ceiling and wall types. Integrated LED light source.

Tier è composta da frame metallici che racchiudono diffusori in vetro bianco satinato, disponibili in due dimensioni. Due configurazioni prevedono l'utilizzo di una singola lampada abbinata a un frame metallico decorativo. Tre configurazioni, invece, prevedono due diffusori e un frame metallico elettrificato che collega entrambi gli apparecchi utilizzando un unico punto luce. Queste ultime permettono inoltre di abbinare due frame metallici decorativi da collocare esternamente ai diffusori mediante appositi distanziatori.

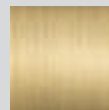

Tier consists of metal frames enclosing matt white glass diffusers, available in two sizes. Two configurations feature a single lamp combined with a decorative metal frame. Three configurations instead feature two diffusers and an electrified metal frame that connects both units using a single light point. These latter configurations also allow two decorative metal frames to be added externally to the diffusers by means of special spacers.

Mia è una lampada dal design essenziale, definita da una linea morbida e pulita. Il diffusore in vetro soffiato bianco satinato si distingue per la leggera bombatura nella parte superiore, che ne esalta la forma delicata. La particolare montatura, completamente nascosta all'interno del vetro, garantisce un'aderenza ottimale alla superficie di installazione, riducendo al minimo la distanza dal supporto. Disponibile nelle versioni soffitto e parete, con sorgente tradizionale o LED integrato.

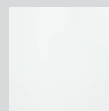

Mia is a lamp with an essential design, defined by soft, clean lines. The satin white blown glass diffuser is gently rounded at the top, enhancing its delicate shape. The special mounting system, completely concealed within the glass, ensures optimal adherence to the installation surface, minimizing the distance from the wall or ceiling. Available in wall and ceiling types, with either traditional or integrated LED light sources.

Infinita è una collezione dal design semplice e senza tempo. Caratterizzata da una forma che ricorda una mezza sfera con fondo pieno. Il diffusore in vetro bianco satinato diffonde una luce uniforme, diffusa e non abbagliante. Ideale per illuminare con eleganza sia ambienti domestici sia spazi professionali, è particolarmente adatta anche a contesti di ampie dimensioni, grazie alle varianti di diametro più grande. Disponibile nelle tipologie a sospensione, soffitto e parete, in tre diverse dimensioni, con sorgente tradizionale o LED integrato.

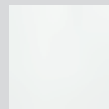

Infinita is a collection with a simple and timeless design. Characterized by a shape reminiscent of a half-sphere with a closed bottom. The matt white glass diffuser emits a uniform, diffused, and glare-free light. Ideal for elegantly illuminating both residential and professional spaces, it is also particularly suited for large environments thanks to its larger diameter variants. Available in suspension, ceiling, and wall types, in three different sizes, with traditional or integrated LED light source.

NOVECENTO

design Romani Sacconi Architetti Associati 2013

NOVECENTO PL

5x60W E14

USA & CANADA

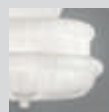

5x40W E12

Novecento nasce dal desiderio di rileggere in chiave contemporanea il tradizionale lampadario muranese. Le sue forme, eleganti e fluide, richiamano la classicità del candeliere veneziano, reinterpretata attraverso un segno essenziale e attuale. Protagonista assoluto è il vetro, disponibile nelle finiture cristallo trasparente o bianco rigadin: le sottili rigature radiali che ne attraversano la superficie evocano il movimento armonico dei bracci dei lampadari storici, regalando alla luce un effetto vibrante e prezioso. La sospensione è proposta in tre dimensioni, pensate per adattarsi con eleganza a spazi di diversa scala e carattere. Le altre tipologie: soffitto, tavolo e terra riprendono la silhouette iconica della sospensione, reinterpretandola con proporzioni e dettagli calibrati.

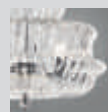

Novecento was born from the desire to reinterpret the traditional Murano chandelier in a contemporary key. Its elegant, fluid shapes recall the classic Venetian candelabra, renewed through a clean and modern design. The true protagonist is the glass, available in clear crystal or white rigadin finishes. The fine radial grooves across its surface evoke the graceful movement of historical chandelier arms, giving the light a vibrant and precious effect. The suspension is offered in three sizes, designed to suit spaces of different scales and characters with elegance. The other types: ceiling, table, and floor retain the iconic silhouette of the suspension, reinterpreted with refined proportions and details.

1x60W G9 / LED D

Diamante è una collezione che si distingue per l'elegante lavorazione artigianale del vetro. Il diffusore viene soffiato all'interno di una gabbia metallica che imprime al cristallo una serie di raggi verticali, partendo dal centro della lampada e percorrendone tutta la superficie. Questa tecnica conferisce al vetro trasparente una poesia unica: quando la lampada è spenta, il gioco delle incisioni crea riflessi preziosi; quando è accesa, la luce si arricchisce di sfumature vibranti e suggestive. Disponibile con sorgente tradizionale o LED integrata. Proposta nelle tipologie sospensione, soffitto e faretto.

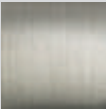

Diamante is a collection that stands out for its refined artisanal glasswork. The diffuser is blown inside a metal cage that imprints a series of vertical rays radiating from the center of the lamp across the entire surface of the glass. This unique technique gives the transparent crystal glass a poetic quality: when the lamp is off, the etched lines create precious reflections; when lit, the light is enriched with vibrant and evocative nuances. Available with traditional or integrated LED light source. Offered in suspension, ceiling, and spotlight types.

Spirit PP 45

SPIRIT PP 45

2x77W E27

USA & CANADA

2x60W E26

La silhouette di Spirit ricorda quella di un diamante soffiato nel vetro. La texture che caratterizza il diffusore nasce da una particolare tecnica di soffiatura all'interno di una gabbia. Questa lavorazione permette di catturare la luce e rifletterla, creando giochi di luce unici. Disponibile nelle tipologie sospensione, soffitto e parete con sorgente luminosa tradizionale. Finitura vetro cristallo trasparente; finitura montatura nickel satinato.

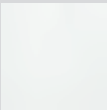

The silhouette of the Spirit resembles that of a diamond blown in glass. The texture characterizing the diffuser is created using a special blowing technique inside a cage. This process allows the light to be captured and reflected, creating unique light effects. Available in suspension, ceiling, and wall types with traditional light source. Glass finish in transparent crystal; frame finish in satin nickel.

Lio è una collezione dal design minimalista e raffinato, che valorizza la sorgente luminosa grazie a una fascia di vetro bianco lucido racchiusa tra strati di cristallo. La forma semplice del diffusore cilindrico è ripresa, con leggere variazioni, anche nelle versioni da parete e da tavolo. Nelle versioni a soffitto e a parete, il diffusore assume una seconda forma, circolare, ed è disponibile in tre misure, mantenendo la particolare lavorazione del vetro che alterna fasce di cristallo e vetro bianco lucido. La collezione è disponibile con sorgente tradizionale o LED integrato.

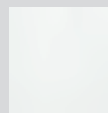

Lio is a collection with a minimalist and refined design that enhances the light source through a glossy white glass band encased between layers of crystal. The simple cylindrical shape of the diffuser is echoed, with slight variations, in the wall and table versions. In the ceiling and wall-mounted versions, the diffuser takes on a second, circular shape and is available in three sizes, maintaining the distinctive glasswork that alternates crystal and glossy white glass bands. The collection is available with either a traditional light source or integrated LED.

Un anello, infinite combinazioni. La matrice da cui nasce l'idea della collezione Ecos è una sola: l'anello di vetro. Questo elemento distintivo rende la collezione estremamente personalizzabile in termini di forme e dimensioni, per un'illuminazione originale e scenografica. Disponibile in vetro bianco o cristallo, entrambi con lavorazione rigadin. Parti metalliche nelle finiture bronzo satinato o cromo lucido. Proposta nelle versioni a sospensione, soffitto, parete e terra.

One ring, endless combinations. The concept behind the Ecos collection is based on a single element: the glass ring. This distinctive shape makes the collection highly customizable in both form and size, offering truly original lighting solutions. Available in white or clear crystal glass, both with rigadin texture. Metal parts come in satin bronze or polished chrome finishes. Offered in pendant, ceiling, wall, and floor versions.

Minigiogali si ispira al gancio in cristallo della collezione Giogali, ma in una versione dalle dimensioni più contenute. Questa variante più essenziale conserva l'eleganza modulare tipica della collezione, offrendo la massima libertà compositiva per soluzioni su misura. Disponibile in diverse tipologie e dieci finiture vetro, Minigiogali rappresenta la scelta ideale per ambienti che richiedono un tocco di leggerezza ed eleganza.

Minigiogali draws inspiration from the crystal hook of the Giogali collection, reinterpreted in a smaller scale. This more essential version retains the modular elegance of the original, offering maximum freedom for custom compositions. Available in various configurations and ten glass finishes, Minigiogali is the perfect choice for spaces that call for a touch of lightness and elegance.

DAMASCO

design Paolo Crepax 2003

Damasco è una collezione realizzata con la tecnica a bozzolo, in cui l'originale decoro diventa materia: fili di vetro trasparente fuso si sovrappongono per creare una texture in rilievo. È possibile scegliere tra tre forme diverse di diffusore, installabili come pendenti singoli o in configurazioni multiple con rosone. Disponibile con sorgente tradizionale o LED integrata. Proposta nelle tipologie sospensione, soffitto, parete e tavolo.

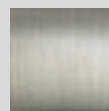

Damasco is a collection crafted using the cocoon technique, where decorative glass threads fuse and layer to form a raised texture that becomes tangible material. You can choose between three diffuser shapes, installable as single pendants or in multi-light configurations with a canopy. Available in traditional or integrated LED versions. Offered in suspension, ceiling, and wall versions.

Tubes is a collection defined by a series of five linear blown glass elements, each distinguished by varying lengths that bring personality and rhythm to the ensemble. The essential and slender shape of the diffusers elegantly adapts to multiple configurations, making the collection a versatile and refined solution for customized lighting projects. Available in suspension and ceiling versions, the collection features glossy white and transparent smoky glass, complemented by matte nickel metal finishes, creating a perfect balance of lightness and character.

1x40W E12

Globose è una collezione dinamica e versatile. La sospensione, disponibile in due dimensioni con quattro o sei diffusori, consente di distribuire la luce a 360°, valorizzando lo spazio. La collezione gioca sull'equilibrio tra due elementi visivamente contrastanti: la rigidità geometrica della struttura e la morbidezza delle forme dei diffusori in vetro soffiato disponibili in due finiture bianco sfumato e una nuova texture cristallo trasparente che ricorda il vetro martellato. La montatura a sezione quadrata si sviluppa in modo fluido e continuo, dando vita a linee ortogonali che si intrecciano e si richiudono su sé stesse. Disponibile anche nella versione applique.

Globose is a dynamic and versatile collection. The pendant version, available in two sizes with four or six diffusers, provides 360° light distribution, enhancing the space. The collection plays on the balance between two visually contrasting elements: the geometric rigidity of the structure and the softness of the blown glass diffusers, available in two finishes shaded white and a new transparent crystal texture inspired by hammered glass. The square-section frame develops in a fluid, continuous way, forming orthogonal lines that intersect and fold back onto themselves. Also available in a wall type.

2x60W G9

L'elemento distintivo di questo modello della collezione Puppet Ring sono gli anelli con diametro crescente, che possono essere accostati con sequenze differenti per costituire l'armatura su cui andare ad appoggiare le preziose sfere in vetro di tre dimensioni differenti che si fondono con la struttura grazie ad una preformatura interna al vetro soffiato. Esteticamente leggero ed elegante, Puppet Ring coniuga in modo etereo vetro cristallo, fumé, ambra e bianco sfumato con finiture oro e nickel nero satinato.

The distinctive feature of this model from the Puppet Ring collection are the rings with increasing diameter. They can be combined in different sequences to form the framework on which the precious glass spheres in three different sizes are placed, blending with the structure thanks to a preformation inside the blown glass. Aesthetically light and elegant, Puppet Ring ethereally combines crystal, smoky, amber and shaded white glass with gold and black matt nickel finishes.

Neochic è una collezione che celebra la purezza e l'unicità del vetro soffiato. Quattro sagome morbide e asimmetriche in vetro bianco satinato, che esprimono un'estetica minimale dal carattere deciso. Nella tipologia soffitto e parete grazie alla particolare montatura, completamente nascosta all'interno del vetro, garantisce un'aderenza ottimale alla superficie di installazione, riducendo al minimo la distanza dal supporto. È disponibile con sorgente tradizionale o LED integrato, nelle versioni sospensione, soffitto e parete.

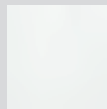

Neochic is a collection that celebrates the purity and uniqueness of blown glass. Four soft, asymmetrical shapes in satin white glass express a minimal aesthetic with a bold character. In the ceiling and wall versions, thanks to the special mounting system completely concealed within the glass, it ensures optimal adherence to the installation surface, minimizing the distance from the support. Available with traditional or integrated LED light sources, in pendant, ceiling, and wall types.

Collezione composta da diffusori in vetro bianco satinato, caratterizzati da due diverse geometrie esagonali irregolari. Nelle versioni da parete e soffitto, che prevedono l'utilizzo di frame metallici con due o tre lampade, ognuna dotata di proprio driver, la montatura pre-cablata consente il decentramento degli elementi, permettendo l'alimentazione di più corpi illuminanti da un unico punto luce. Disponibile con sorgente LED integrata o tradizionale.

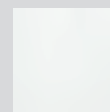

Collection composed of matt white glass diffusers, featuring two distinct irregular hexagonal geometries. In the wall and ceiling versions, which include metal frames with two or three light fixtures each equipped with its own driver, the pre-wired mounting system allows for the decentering of the elements, enabling multiple lights to be powered from a single electrical point. Available with integrated LED or traditional light source.

FUTURA

design Hangar Design Group 2015

Futura è una collezione di lampade in un unico pezzo di vetro soffiato, realizzato con una tecnica speciale che crea un raffinato doppio effetto: nella parte superiore il cristallo trasparente, mentre in quella inferiore il vetro incamiciato colorato nasconde la sorgente luminosa. È disponibile in tre diverse cromie: ambra con anello in ottone, bianco con anello nero opaco e fumé con anello marrone. La versione con diffusore interamente in cristallo trasparente è invece proposta con anello in rame o nero opaco. La collezione è disponibile nelle versioni a sospensione, soffitto, parete, tavolo e terra.

Futura is a collection of lamps made from a single piece of hand-blown glass, crafted using a special technique that creates a refined double effect: transparent crystal on the upper part, while the colored cased glass on the lower part conceals the light source. It is available in three different color combinations: amber with a brass ring, white with a matt black ring, and fumé with a brown ring. The version with a fully transparent crystal diffuser is instead offered with a copper or matt black ring. The collection is available in suspension, ceiling, wall, table, and floor versions.

Lio è una collezione dal design minimalista e raffinato, che valorizza la sorgente luminosa grazie a una fascia di vetro bianco lucido racchiusa tra strati di cristallo. La forma semplice del diffusore cilindrico è ripresa, con leggere variazioni, anche nelle versioni da parete e da tavolo. Nelle versioni a soffitto e a parete, il diffusore assume una seconda forma, circolare, ed è disponibile in tre misure, mantenendo la particolare lavorazione del vetro che alterna fasce di cristallo e vetro bianco lucido. La collezione è disponibile con sorgente tradizionale o LED integrato.

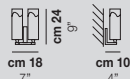

Lio is a collection with a minimalist and refined design that enhances the light source through a glossy white glass band encased between layers of crystal. The simple cylindrical shape of the diffuser is echoed, with slight variations, in the wall and table versions. In the ceiling and wall-mounted versions, the diffuser takes on a second, circular shape and is available in three sizes, maintaining the distinctive glasswork that alternates crystal and glossy white glass bands. The collection is available with either a traditional light source or integrated LED.

DIADEMA

design Romani Saccani Architetti
Associati 2005

Luce in movimento. È la sensazione che pervade l'ambiente quando si accende una Diadema. Ogni composizione nasce da un singolo elemento: una canna in vetro di cristallo trasparente. Attraverso un sistema modulare che combina canne di diverse lunghezze, la luce si riflette e si propaga con dinamismo. Numerose le varianti e le possibilità di personalizzazione. Finiture metalliche: bronzo satinato o cromo lucido.

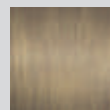

Light in motion. This is the sensation that fills the space when a Diadema is switched on. Each composition originates from a single element: a transparent crystal glass rod. Through a modular system that combines rods of different lengths, light reflects and spreads dynamically. Numerous variations and customization options are available. Metal finishes: matt bronze or glossy chrome.

Stardust è una collezione di lampade in cui l'eleganza del vetro soffiato e lavorato a mano si unisce a un design raffinato e funzionale. I bracci in vetro, delicati e leggeri, sembrano fluttuare sospesi, mentre le strutture metalliche celano con maestria un sistema originale di fissaggio e cablaggio, garantendo pulizia e armonia formale. Disponibile nelle versioni sospensione e applique, Stardust si distingue per il vetro cristallo trasparente con raffinata lavorazione rigadin e per la finitura in nickel nero della montatura, che aggiunge un tocco di modernità e carattere.

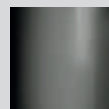

Stardust is a collection where the elegance of hand-blown glass arms meets refined and functional design. The delicate, airy glass arms seem to float suspended, while the metal structures skillfully conceal an original fixing and wiring system, ensuring a clean and harmonious form. Available as suspension and wall sconce, Stardust stands out for its transparent crystal glass with delicate rigadin texture and black nickel frame finish, adding a modern touch and character.

1×60W E12

Anisette è una collezione dalle geometrie moderne, che richiama la forma di una lanterna. Grazie a un particolare sistema di aggancio, che nasconde completamente la montatura e consente il fissaggio dei vetri senza forature, i due diffusori in cristallo bianco sfumato possono essere composti in quattro configurazioni diverse, giocando con la sorgente luminosa interna e con le trasparenze del vetro. Una lampada scultorea che, da accesa, crea atmosfere coinvolgenti grazie alla sfumatura del vetro, e da spenta si trasforma in un oggetto di design che arreda con carattere. Finitura struttura bianco opaco. Disponibile nelle tipologie sospensione e tavolo.

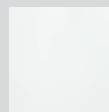

Anisette is a collection defined by modern geometries, reminiscent of a lantern's shape. Thanks to a special fastening system that fully conceals the mounting structure and allows the glass elements to be fixed without drilling, the two shaded white crystal diffusers can be arranged in four different configurations, playing with the inner light source and the transparency of the glass. A sculptural lamp that, when lit, creates an immersive atmosphere through the delicate shading of the glass and when off, becomes a striking design piece. Matt white metal finish. Available in suspension and table types.

ALEGA

design Vico Magistretti 1970

Alega è una lampada da tavolo che unisce l'eleganza del classico a una raffinata ispirazione rétro. Le sue linee armoniose sembrano attraversare il tempo, reinterpretando con leggerezza forme familiari. La base in vetro trasparente sostiene un diffusore in vetro bianco lucido che diffonde la luce, regalando all'ambiente un'atmosfera calda e accogliente. Dotata di tre lampadine tradizionali, Alega sorprende per la sua apparente semplicità formale, che rivela un equilibrio perfetto tra proporzioni e materiali. Le finiture metalliche cromate conferiscono un tocco di moderno, dialogando con l'estetica senza tempo dell'insieme.

Alega is a table lamp that blends timeless elegance with a refined retro inspiration. Its graceful silhouette recalls familiar shapes, reinterpreted with a light and contemporary touch. A transparent glass base supports a glossy white glass diffuser that softly spreads the light, creating a warm and welcoming atmosphere. Equipped with three traditional light bulbs, Alega offers a perfect balance of form and function, where apparent simplicity conceals thoughtful proportions and refined details. Chrome-plated finishes lend a contemporary accent, subtly enhancing the lamp's timeless design.

NESSA

design Vistosi 1972

Nessa è una lampada da tavolo dall'iconico design, essenziale nelle forme e preziosa nella sua lavorazione artigianale. Il diffusore in vetro si caratterizza per la presenza di due diverse finiture: una fascia inferiore trasparente lascia passare la luce in modo diretto, mentre la parte superiore, in vetro bianco lucido, lascia filtrare una luce perfetta d'ambiente. Un oggetto che coniuga purezza formale e sapienza materica, pensato per impreziosire con discrezione ogni ambiente.

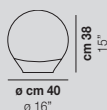

Nessa is a table lamp with an iconic design, essential in its form and refined in its artisanal craftsmanship. The glass diffuser features two distinct finishes: a transparent lower band that allows light to pass through directly, and an upper section in glossy white glass that gently filters a perfect ambient glow. An object that combines formal purity and material expertise, designed to enhance any space with understated elegance.

LIO

design Vistosi 1972

Lio è una collezione dal design minimalista e raffinato, che valorizza la sorgente luminosa grazie a una fascia di vetro bianco lucido racchiusa tra strati di cristallo. La forma semplice del diffusore cilindrico è ripresa, con leggere variazioni, anche nelle versioni da parete e da tavolo. Nelle versioni a soffitto e a parete, il diffusore assume una seconda forma, circolare, ed è disponibile in tre misure, mantenendo la particolare lavorazione del vetro che alterna fasce di cristallo e vetro bianco lucido.

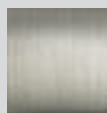

Lio is a collection with a minimalist and refined design that enhances the light source through a glossy white glass band encased between layers of crystal. The simple cylindrical shape of the diffuser is echoed, with slight variations, in the wall and table versions. In the ceiling and wall-mounted versions, the diffuser takes on a second, circular shape and is available in three sizes, maintaining the distinctive glasswork that alternates crystal and glossy white glass bands.

Naxos è una lampada da tavolo che si declina in quattro dimensioni, capace di fondere design senza tempo e raffinata artigianalità. Il vetro soffiato bianco satinato si abbina a finiture metalliche bianco lucido, donando un'eleganza discreta e sofisticata. Le due sorgenti luminose, posizionate nella base e all'interno del paralume, diffondono una luce avvolgente e uniforme.

Naxos is a table lamp available in four sizes, blending timeless design with refined craftsmanship. The blown satin white glass pairs with glossy white metal finishes, imparting a discreet and sophisticated elegance. Two light sources, positioned in the base and inside the shade, emit a warm and even glow.

NOVECENTO

design Romani Sacconi Architetti 2015

Novecento nasce dal desiderio di rileggere in chiave contemporanea il tradizionale lampadario muranese. Le sue forme, eleganti e fluide, richiamano la classicità del candelieri veneziano, reinterpretata attraverso un segno essenziale e attuale. Protagonista assoluto è il vetro, disponibile nelle finiture cristallo trasparente o bianco rigadin: le sottili rigature radiali che ne attraversano la superficie evocano il movimento armonico dei bracci dei lampadari storici, regalando alla luce un effetto vibrante e prezioso. La sospensione è proposta in tre dimensioni, pensate per adattarsi con eleganza a spazi di diversa scala e carattere. Le altre tipologie: soffitto, tavolo e terra riprendono la silhouette iconica della sospensione, reinterpretandola con proporzioni e dettagli calibrati.

Novecento was born from the desire to reinterpret the traditional Murano chandelier in a contemporary key. Its elegant, fluid shapes recall the classic Venetian candelabra, renewed through a clean and modern design. The true protagonist is the glass, available in clear crystal or white rigadin finishes. The fine radial grooves across its surface evoke the graceful movement of historical chandelier arms, giving the light a vibrant and precious effect. The suspension is offered in three sizes, designed to suit spaces of different scales and characters with elegance. The other types: ceiling, table, and floor retain the iconic silhouette of the suspension, reinterpreted with refined proportions and details.

DAMASCO

design Paolo Crepax 2003

Damasco è una collezione realizzata con la tecnica a bozzolo, in cui l'originale decoro diventa materia: fili di vetro trasparente fuso si sovrappongono per creare una texture in rilievo. È possibile scegliere tra tre forme diverse di diffusore, installabili come pendenti singoli o in configurazioni multiple con rosone. Disponibile con sorgente tradizionale o LED integrata. Proposta nelle tipologie sospensione, soffitto, parete e tavolo.

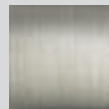

Damasco is a collection crafted using the cocoon technique, where decorative glass threads fuse and layer to form a raised texture that becomes tangible material. You can choose between three diffuser shapes, installable as single pendants or in multi-light configurations with a canopy. Available in traditional or integrated LED versions. Offered in suspension, ceiling, and wall versions.

PEGGY

design Hangar Group 2014

Peggy nasce dall'incontro di opposte polarità cromatiche e materiche. Un progetto illuminotecnico che unisce la leggerezza del vetro soffiato bianco lucido, lavorato interamente a mano, alla forza espressiva del metallo: nero lucido o ottone anticato. Un connubio di grande impatto visivo, capace di esprimere al contempo razionalità ed eleganza. Disponibile come sospensione, in versione singola o a nove luci, oltre che nelle tipologie parete e terra.

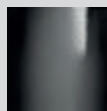

Peggy is born from the meeting of opposing chromatic and material polarities. A lighting design project that combines the lightness of glossy white blown glass, entirely handmade, with the expressive strength of metal: glossy black or antique brass. A combination with great visual impact, capable of expressing both rationality and elegance. Available as a suspension, in single or nine-light versions, as well as in wall and floor types.

LUCCIOLA

design Vistosi 1981

Lucciola è una collezione iconica che celebra l'eleganza del vetro soffiato. La forma ovale del diffusore in vetro satinato bianco è proposta in cinque diverse dimensioni, studiate per adattarsi con equilibrio a spazi di diversa ampiezza. La collezione si articola in cinque tipologie: sospensione, soffitto, parete, tavolo e terra garantendo versatilità e personalità in ogni ambiente. Le versioni a sospensione sono disponibili con finiture metalliche in bianco opaco o nickel satinato, per una perfetta integrazione con lo stile dello spazio.

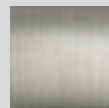

Lucciola is an iconic collection that celebrates the elegance of blown glass. The oval-shaped diffuser, made of satin white glass, is available in five different sizes, designed to harmoniously suit spaces of various dimensions. The collection includes five types: suspension, ceiling, wall, table, and floor offering versatility and character in any setting. Suspension models come with metal finishes in matte white or satin nickel, allowing seamless integration with different interior styles.

FUTURA

design Hangar Design Group 2015

Futura è una collezione di lampade in un unico pezzo di vetro soffiato, realizzato con una tecnica speciale che crea un raffinato doppio effetto: nella parte superiore il cristallo trasparente, mentre in quella inferiore il vetro incamiciato colorato nasconde la sorgente luminosa. È disponibile in tre diverse cromie: ambra con anello in ottone, bianco con anello nero opaco e fumé con anello marrone. La versione con diffusore interamente in cristallo trasparente è invece proposta con anello in rame o nero opaco. La collezione è disponibile nelle versioni a sospensione, soffitto, parete, tavolo e terra.

Futura is a collection of lamps made from a single piece of hand-blown glass, crafted using a special technique that creates a refined double effect: transparent crystal on the upper part, while the colored cased glass on the lower part conceals the light source. It is available in three different color combinations: amber with a brass ring, white with a matt black ring, and fumé with a brown ring. The version with a fully transparent crystal diffuser is instead offered with a copper or matt black ring. The collection is available in suspension, ceiling, wall, table, and floor versions.

ECOS

design Renato Toso, Noti Massari 2007

Un anello, infinite combinazioni. La matrice da cui nasce l'idea della collezione Ecos è una sola: l'anello di vetro. Questo elemento distintivo rende la collezione estremamente personalizzabile in termini di forme e dimensioni, per un'illuminazione originale e scenografica. Disponibile in vetro bianco o cristallo, entrambi con lavorazione rigadin. Parti metalliche nelle finiture bronzo satinato o cromo lucido. Proposta nelle versioni a sospensione, soffitto, parete e terra.

One ring, endless combinations. The concept behind the Ecos collection is based on a single element: the glass ring. This distinctive shape makes the collection highly customizable in both form and size, offering truly original lighting solutions. Available in white or clear crystal glass, both with rigadin texture. Metal parts come in satin bronze or polished chrome finishes. Offered in pendant, ceiling, wall, and floor versions.

MINIGIOGALI

design Angelo Mangiarotti 1967

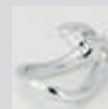

Minigiogali si ispira al gancio in cristallo della collezione Giogali, ma in una versione dalle dimensioni più contenute. Questa variante più essenziale conserva l'eleganza modulare tipica della collezione, offrendo la massima libertà compositiva per soluzioni su misura. Disponibile in diverse tipologie e dieci finiture vetro, Minigiogali rappresenta la scelta ideale per ambienti che richiedono un tocco di leggerezza ed eleganza.

Minigiogali draws inspiration from the crystal hook of the Giogali collection, reinterpreted in a smaller scale. This more essential version retains the modular elegance of the original, offering maximum freedom for custom compositions. Available in various configurations and ten glass finishes, Minigiogali is the perfect choice for spaces that call for a touch of lightness and elegance.

Collezione che propone elementi con due geometrie a esagono irregolare nelle versioni a sospensione, soffitto e parete. Nelle ultime due tipologie la forma emisfatta permette di combinare le due dimensioni insieme per creare infinite configurazioni. Nelle versioni a parete e soffitto, i frame disponibili per alcune versioni, nascondono i cablaggi e permettono il decentramento degli elementi con un'unica uscita cavo. Il LED integrato garantisce un'illuminazione diffusa, uniforme e non abbagliante.

This collection features elements with two irregular hexagonal geometries in suspension, ceiling, and wall versions. In the last two types, this beveled shape allows for combining both sizes to create endless configurations. In the wall and ceiling versions, frames available for certain models hide the wiring and allow for the decentralization of elements with a single cable outlet. The integrated LED provides diffuse, uniform, and non-glare lighting.

Artistic and literary property reserved worldwide. Reproduction, even partial, of texts, drawings, images and any content in general is prohibited without permission.

Variazioni cromatiche: le illustrazioni possono discostarsi anche sensibilmente dalle reali cromie dei materiali rappresentati sia a causa dei processi di conversione delle fotografie ma anche alle caratteristiche stesse dei materiali ed ai loro sistemi di produzione. In particolar modo le differenze possono essere ancora più rilevanti nel caso del vetro di Murano dovute all'artigianalità delle lavorazioni e dei processi di fusione.

Chromatic variations: the illustrations may differ significantly from the actual colors of the materials represented, due both to the image conversion processes and to the inherent characteristics of the materials and their production methods. In particular, differences may be even more pronounced in the case of Murano glass, due to the artisanal nature of its craftsmanship and fusion processes.
