UNPARALLELED FLEXIBILITY

kreon noite

kreon

Completing the dot-stripe-line trio is kreon noite, a groundbreaking linear profile system that redefines the concept of architectural lighting.

Comprising “dots” of lights, kreon noite can be recessed or surface-mounted, offering unparalleled flexibility.

Tailor-made to your specifications, you have the freedom to choose the position of the light points within the profile, providing a customized solution for each unique space. Additionally, if controlled with DALI, it is even possible to control all modules separately.

kreon noite represents a fusion of innovative design and personalized functionality, setting a new standard for architectural lighting systems.
