Luxxbox to Show New Linea Acoustic Pendant Light at NeoCon 2019

LINEA ACOUSTIC LIGHT ADDRESSES WORKPLACE NOISE CREATING A MORE PRODUCTIVE AND COMFORTABLE WORK ENVIRONMENT

[Luxxbox](#), a leading designer of acoustic solutions, announced that it will be exhibiting the new Linea acoustic pendant light during NeoCon 2019, June 10-12 at The Mart in Chicago, Illinois. Linea, along with Luxxbox's other new products, will be on display at booth #7-4078 on the 7th floor.

"Our latest acoustic pendant, Linea, offers sleek, streamlined noise reduction for a more productive, enjoyable, and healthy workplace," said Jason Bird, Founder and Creative Director of Luxxbox. "Featuring an innovative design, Linea increases the noise reduction coefficient

(NRC) of the raw acoustic material, performing better than other acoustic solutions of a similar size and material.”

The Luxxbox Linea acoustic LED lighting system boasts class leading LED performance as well as superior acoustic properties, significantly reducing reverberated noise in open space for increased comfort and wellbeing. Manufactured from a dense polyester fiber material that includes a minimum of 65% post-consumer recycled content, Linea is 100% recyclable and is offered in two finishes and a wide range of sizes and colors.

The variety of heights and lengths allow for optimal customization for any interior space. The height options include 1', 2' and 3' while lengths range between 2' and 8'. Unique to Linea's design, internal magnets yield easy, on-site connection of multiple pendants, extending runs for infinite lengths. Offered in more than 15 colors, options range from neutrals such as black, white, and grey, to modern hues including blue, green, red, orange, and yellow, to the latest in color forecasting: emerald green, forest green, and blush.

Linea is also available in two designs—flat and ribbed. The flat finish offers a sleek look, while ribbed version features innovative grooves which further increase the acoustic surface area, bolstering the noise reduction coefficient (NRC).

Linea can be hung independently, magnetically linked for a continuous, sleek lighting feature, or clustered as unique statement piece within the space—the possibilities are endless.

Quality space and noise-management solutions make for happy environments. Luxxbox's acoustic lighting, baffles, and furniture products turn down the volume to increase productivity, creating happy, healthy workspaces the world over.
